

**Mathematics:**

Check the video and start the activity!

<https://www.youtube.com/watch?v=zsv7bYSrzMU>

Measurements in meter

1. Take a piece of paper or a ribbon that you have at home! Cut it in one meter. half a meter and a quarter of a meter.
2. Now write down I, your notebook the following questions:  
How many centimeters is a meter?  
How many centimeters is half a meter?  
How many centimeters is a quarter of a meter?
3. Take measurements. Choose 10 objects that are outside in the patio and register in your notebook making a table. On the left the name of the objects and on the right the measurement.
4. Now measure 10 more from inside your house

**Science:**

See this video <https://www.youtube.com/watch?v=yXCeuSiTOug> and we ask you in your notebook to illustrate us and describe us:

1. Magnetism
2. Attraction
3. Repulsion

Look around you and write 5 examples of this phenomenon.

**Reading:**

Go outside with your jacket and enjoy the weather outside while reading 15 minutes.

**Art:**

Kandinsky Art Dictation

1. Go over the work of Kandinsky, see some of his art pieces
2. Using his technique create your own design following the instructions given next
3. In a white art paper draw, then color: 2 sets of horizontal parallel lines, 3 circles, 1 semicircle, 3 oblique lines, 4 vertical lines, a square, a triangle, a symbol of #.

Read and help at home with chores.
