

Math

Fractions equivalence

$$\frac{2}{8} + \frac{4}{5} = \frac{5}{6} + \frac{7}{4} =$$

$$\frac{6}{7} + \frac{2}{3} = \frac{4}{9} + \frac{3}{3} =$$

$$\frac{1}{8} + \frac{6}{4} = \frac{3}{6} + \frac{1}{8} =$$

$$\frac{7}{6} + \frac{4}{5} = \frac{5}{2} + \frac{7}{8} =$$

Conversion to decimals

$$\frac{3}{5} = \frac{5}{6} = \frac{7}{8} = \frac{4}{2} =$$

$$\frac{2}{5} = \frac{3}{9} = \frac{6}{8} = \frac{2}{7} =$$

History:

1. Read about The Black Death on line.
 2. Watch the video “The Black Death explained: Global History Review” on YouTube
 3. Return to the video, this time take notes.
 4. Draw and color a map of the silk route, tracing the path from Mongolia to Europe.
- Paste with your notes

Science:

1. Investigate the process of infection of Rickettsia rickettsii (ricketsiosis)
2. Check number of infections registered in Juarez or the region this year
3. Explain how a person can act if bitten by a tick. Where can medical attention be received to attend these cases.

Art:

Kandinsky Art Dictation

7. Go over the work of Kandinsky, see some of his art pieces
8. Using his technique create your own design following the instructions given next
9. In a white art paper draw, then color: 2 sets of horizontal parallel lines, 3 circles, 1 semicircle, 3 oblique lines, 4 vertical lines, a square, a triangle, a symbol of #.

Read and help at home with chores.
